APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 61376 is issued subject to the terms and conditions imposed in said Permit 61376 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the Proof of Completion of Work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 63664 through 63691, inclusive, shall not exceed 3,480.0 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Issuance of Permits 63687 through 63691, inclusive, shall totally abrogate Permit 61376.

Should Las Vegas Valley Water District Applications 54022 through 54030, inclusive, be considered in the future, the amount of water available in Snake Valley would be reduced by the amount already appropriated, and that this "amount already appropriated" will include appropriations under Applications 61372 through 61376, or change applications thereto.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.67 cubic feet per second, but not to exceed 120.0 acre-feet annually, and not to exceed a yearly duty of 3.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

July 18, 2000

Proof of completion of work shall be filed before:

August 18, 2000

Application of water to beneficial use shall be filed on or before:

July 18, 2002

Proof of the application of water to beneficial use shall be filed on or before:

August 18, 2002

Map in support of proof of beneficial use shall be filed on or before:

August 18, 2002

IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E.,
State Engineer of Nevada, have hereunto set
my hand and the seal of my office,
